

The Future of Security is in Technology

Technology is no longer an optional extra when implementing security solutions. Over the last few years, 24/7 Security Services has researched, tested and invested in several technologies. The state-of-the-art 24/7 Command Centre supports and manages our technology solutions - from the highly advanced 24/7 Smart Surveillance to the newly launched 24/7 ePOD.

Our extensive infrastructure and skilled team have enabled us to adapt effectively to the need for no-contact, high-tech solutions required during COVID-19.

We share some recent successes and current information happening in the technology space.

24/7 Security Services and Vumacam AI Surveillance enable successful arrests

This week, the 24/7 Security Command Centre and Armed Reaction Team, enabled by accurate surveillance, were instrumental in a highly-effective

response that resulted in the arrest of four suspects.

Technology surpasses traditional security systems to secure private and commercial properties

Recently, 24/7 Smart Surveillance detected suspects trying to gain unauthorised access to a client's property. The video footage was used to identify the access code entered by the suspect, and they were prevented from gaining access to the property. The vehicle's details were loaded on the VOI (Vehicles of Interest) database, and the movement tracked using the Vumacam surveillance network.

24/7 Smart Surveillance

24/7 Smart Surveillance is a technology that enables CCTV systems to intelligently assess an environment and notify the 24/7 Command Centre of an intrusion. The technology draws immediate attention to unauthorised activity, allowing us to intervene and react before a crime occurs.

In contrast, traditional means of CCTV surveillance only cater for investigations after the crime has occurred, in many cases having costly consequences for the business or homeowner.

While the technology behind proactive off-site video monitoring is sophisticated, the way it prevents potential crimes is easy to understand:

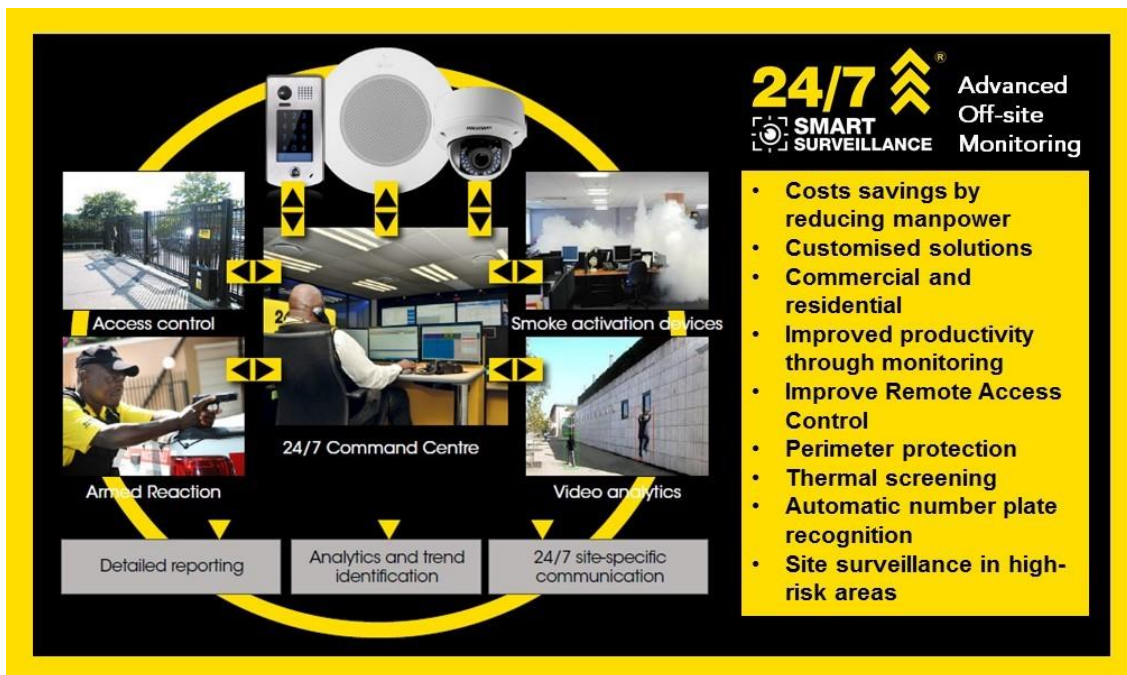

1. A potential threat approaches the perimeter of your site or property.
2. This threatening activity is picked up by AI technology.
3. An alert is sent within seconds to the 24/7 Command Centre.
4. The operator assesses the threat over a live video feed and actions the required response – audio warning, Armed Response deployment etc.

Proactive monitoring systems can be armed and disarmed for specific types of activity and certain times of the day. This is especially useful for business

owners because it allows them the control to set the system to arm outside of business hours.

Video surveillance can be divided into two categories - proactive and reactive. Reactive video systems solely rely on surveillance footage of the crime after it has taken place and cannot prevent a crime occurring.

Proactive video monitoring, such as 24/7 Smart Surveillance, differs from reactive monitoring because the intelligent detection software employed behind each camera effectively turns it into a 24/7, 365-day security guard.

Customised contactless access and monitoring system using 24/7 Smart Surveillance technology.

Examples of 24/7 Smart Surveillance detections. Sites are monitored 24 hours a day by the 24/7 Command Centre.

24-7 Security Services has joined forces with Dahua to provide a solution that effectively manages human flow control in the retail, commercial and educational sectors. This solution enables clients to operate and trade while adhering to COVID-19 protocols.

Peace of mind in the palm of your hand

The 24/7 ePOD emergency panic system is an affordable tailor-made solution that provides you access to help when you need it most.

A panic system is only effective if it provides for easy activation and fast response. In today's world, it is essential to have access to a panic system 24/7 - whether you are at home, at work, or out there cycling, running or walking.

The 24/7 ePOD is perfectly suited for schools to use both on and off-campus. Learners, teachers, parents and boarders can all benefit from this mobile panic system. As no cell phone is required, it is perfect for sports days and field trips.

[See how the 24/7 ePOD fills the gap that traditional security solutions don't always do.](#)
