A house break-in was reported at No.8 Singer Street. It was reported that B06 received a power failure signal when he went to check he found that the house had no power but other houses had power and he informed the Control Room of his findings. The power supply box was locked with a padlock so he could not check is switches were up or not. Later he was sent again to double check on his arrival he found the guard house and windows open he closed and left. When he was sent again under the instruction that the client was away so special patrols should be conducted he found the guard house door wide open and the door leading to the main house open as well. He called for backup, B75 arrived and both checked inside and found that the base radio was on the floor with broken chair and crowbar on the floor. The door leading to the property was forced open and damaged and other items and hunting rifle were next to the guard house. On further investigation, it was suspected that some of electrical appliances, jewellery and laptops were missing as the whole house was ransacked. It was also discovered that the suspects used the guard house to gain access and used the window to enter the house and found doors unlocked. SAPS informed, Constable Mphahlele and Constable Mathosa attended the scene driving a marked SAPS vehicle registration number BTZ 407 B and a case of house break-in was opened for further investigation.
